To my knowledge the above listing of Miniature Gladiolus covers the widest range in color of any grower, offering in commercial quantity.

The Miniature varieties are becoming more popular each year and many varieties are completely sold out long before our Spring selling season is over. One of the local Roadside stands move nearly as many Miniatures as they do the larger sized bloom.

HOLLAND BUTTERFLY TYPE: The new Holland Butterfly Type of Gladiolus is really in a class by itself. The color combinations are very good and one can readily see some concern has been taken in making their selection. Not hooded, but wide open with the side petals winged way out, they are well named - BUTTERFLY

Stores and Garden Shops handling Gladiolus bulbs in their Spring Sales would do well in offering Miniature and Butterfly Gladiolus bulbs. These varieties are new to many of your Garden Club customers and those who go in for the more popular table arrangements.

PLEASE NOTE: Miniature varieties are listed as Large; Medium and Small. Large will be #1 - #2; Medium #3 - #4; Small #5 - #6. Please do not order as #1 or #2 etc. Count on any size ordered will be made up with equal count insofar as size is concerned, as long as we have sufficient stock to do so. On some varieties the count on #1 might run higher than #2. On the Medium size we use a bulk of #3 if stock is available. Miniatures do not build up stock as rapidly as the larger size varieties. Some varieties are very slow, producing only 8-10 bulblots per bulb at digging time
